## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 09/20/2006 is being considered by the examiner.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 26-52 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are generally narrative in form, and replete with functional or operational language; wherein, it is not clear as to whether if the various elements as recited in the instant claims are intended to form parts of the instant claimed invention, or such elements are merely parts of the intended use environment of the instant claimed invention.

The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Applicant is suggested to rewrite the instant claims in accordance with the U.S. practice to positively define the instant claimed invention.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 51-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Grant et al. (6,450,104).** Grant et al. discloses a vehicle (10) for travel through a conduit comprising: an extensible body capable of extending and retracting in length; there being associate with each end of the extensible body a wall-engaging mechanism comprising a plurality of legs (60) attached by a pivotable connection (53, 59, See Fig. 3A and 3B) at the end closest the extensible body, said pivotable connection allowing the leg to extend outwardly; said leg including a wall-engaging foot portion (64) distal to the pivotable connection; there being a single actuator (45) arrangement associated with each wall engaging mechanism to effect synchronised outward and inward pivoting of the legs of the wall engaging mechanism about their pivotable connections; the arrangement allowing for alternate extension and retraction of the legs of each wall engaging mechanism, co-ordinating this with extension and retraction of the extensible body to allow lengthwise movement of the vehicle within a conduit; said vehicle including either or both of apparatus for the removal of material from the internal wall of a conduit, or inspection means for monitoring the interior of a conduit (See Fig. 3A & 3B, col. 1, lines 19-67, and col. 2, lines 1-63).

***Allowable Subject Matter***

1. Claims 26-50 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
